

No More Headaches or Dangerous Chemicals!

WORLD'S ONLY HANDS-FREE SWIMMING POOL WATER SANITIZER!

Crystal Clear Water!

90% LESS Chlorine!

Saves You Money!

NASA Developed Ionization System Makes Chlorine & Saltwater Treated Pools Obsolete!

www.GoChemless.com

It's finally here! Enjoy **crystal clear, healthy, clean** pool water – without the dangers and hassles of chlorine or saltwater systems.

Using proven and tested **NASA developed** technology, our Go Chemless™ 138MS System is the ultimate in green technology – keeping your pool virus, fungus, bacteria and algae free – without using harmful and dangerous chemicals.

Designed and built by a team of **organic chemists and experienced engineers**, Go Chemless™ is the first bio-sanitizing system that automatically and continuously keeps your pool water absolutely pristine – with almost no effort on your part!

ATTENTION! Saltwater System Users – Chlorine in Disguise!

If you think you are avoiding the hazards of chlorine by using saltwater systems, think again. The ugly truth is this: Saltwater systems typically **PRODUCE MORE CHLORINE** than conventional chlorinated systems.

How Does Go Chemless™ Work?

It's called **bio-sanitizing ionization**, developed for keeping drinking water safe and pure during space-missions. Precise amounts of both silver and copper ions are infused into your pool water. These ions are totally friendly to you and your pets, but devastating to mold, viruses, bacteria and algae.

Our Go Chemless™ System is a first – incorporating a micro-processor working in tandem with the sanitizing unit housing copper and silver – monitoring the water 24/7. **This hands-free action is automatic.** The system knows exactly how much sanitizing is needed at any given moment by keeping constant surveillance on water quality levels.

Why Copper and Silver Ions?

Simple – because they work like nothing else! The great benefit about copper and silver is that unlike chlorine, they have been shown to be **completely safe** for humans.

- These metallic ions are proven anti-bacterial, anti-fungal, anti-algae and anti-viral agents - interacting with and eliminating these harmful organisms
- In the case of algae, copper prevents photosynthesis - leading to their eradication due to insufficient energy production.
- In fact, many hospitals around the world use copper/silver ionization systems to purify their drinking water.

Go Chemless™ - Safer, Simpler & Far More Effective than Chlorine or Salt!

Why Go Chemless™ Is Simply Better!

- Drastically Reduces Caustic, Health-Damaging Chlorine
- Environmentally Friendly
- Helps Clear Away Algae, Bacteria, Viruses, Mold and Fungus
- Reduces Trihalomethanes (THMs) & Chloroforms 
- No More Red, Itchy Eyes, Dry Skin or Damaged Hair
- No More Hacking "Swimmer's Cough"
- No More Overpowering Chlorine Smells or Tastes
- Reduces Muriatic Acid and other Dangerous Chemicals
- Kid Friendly, Parent Friendly and Pet Friendly
- Lower Maintenance Costs – Pays For Itself in Less Than 3 Seasons
- Hands-Free and Hassle Free Operation – Works 24/7 to Keep Your Water Sparkling, Crystal Clear & Clean
- Built to Last: Outstanding 5 Year Guarantee on System Components
- 30 Day "Love It or Leave It" In-Pool Trial

The Purest, Clearest, Healthiest Pool Water You Will Ever Experience!

CONTENTS:

Control Unit,
Sanitization Chamber,
Adapters, 12 Volt UL
Power Supply with
110v and 220v
Adapters, Screws,
Drill Bit, Test Strips,
Installation and
Operation Manual

Easy to Install & Operate

Installation only takes few minutes.

It is simple as **1-2-3!**

1. Make two (2) cuts into your existing pool's PVC pipe.

2. Glue in the Sanitization Chamber.

3. Mount and plug in the Control Unit into a 110v or 220v power source.

Step-by-step online videos are available for viewing.

FACTS:

Originally developed by NASA scientists to use on manned space and moon missions, Go Chemless™ takes water bio-sanitizing to an entirely new level! Our engineers and organic chemists have combined the power of silver and copper ions with the incredible accuracy of micro-computer technology – with the result being your pool water is kept clean, clear and fresh – 24/7!

Saltwater Systems – Chlorine in Disguise! Saltwater pools are **NOT CHLORINE FREE** – far, far from it. In fact, saltwater pools – which are actually **BANNED** in some localities – have MORE chlorine than regular chlorinated pools. Here's why: The salt infused pool water is forced through a high voltage cell, which produces... **Chlorine!** (And lots of it!) Not only that, but saltwater is **highly corrosive** and can deteriorate your pool's finish while corroding pumps and other metal parts (such as ladders).

Trihalomethanes (THMs) are a family of exceedingly dangerous and hazardous chemicals found in Chlorine, which are collectively suspected to cause cancer. THMs are absorbed through your skin and are known to cause asthma. THMs are also linked to bladder and colon cancer as well as being linked to reproductive issues and birth defects.

Hands Free & Hassle Free Operation – Once installed, you can just about forget Go Chemless™ is even there! It works silently in the background, constantly monitoring your pool water, and releasing the **PRECISE** amounts of ions needed to keep your pool water safe and clear.

The Centers for Disease Control and Prevention (CDC) in a federal study reported that there are an average of 4,700 cases of injury and illness caused by swimming pool chemicals in the United States reported annually. Don't be another statistic!

Proudly Made in the USA! We support American ingenuity and progress at its best – that's why we make Go Chemless™ right here in the United States!
